

# Download The Physiology And Phenomenology Of Action

Hier sollte eine Beschreibung angezeigt werden, diese Seite lässt dies jedoch nicht zu. Enactivism argues that cognition arises through a dynamic interaction between an acting organism and its environment. It claims that our environment is one which we selectively create through our capacities to interact with the world.

"Organisms do not passively receive information from their environments, which they then translate into ... Pharmacology is the branch of biology concerned with the study of drug action, where a drug can be broadly defined as any man-made, natural, or endogenous (from within the body) molecule which exerts a biochemical or physiological effect on the cell, tissue, organ, or organism (sometimes the word pharmacion is used as a term to encompass these ... Long-term abolition of a brain arousal system impairs wakefulness (W), but little is known about the consequences of long-term enhancement. The histaminergic arousal system is under the negative ...
